

COCO PEAT

100% Natural & Eco-Friendly Growing Media — Export Quality from Kerala, India

Nisha & Co is a leading exporter of premium coco peat from Kerala, India, supplying high-quality growing media to horticulture, agriculture, and hydroponics markets across the Gulf, Europe, and Asia.

Processed from coconut husk — a 100% natural and renewable byproduct — our coco peat is pre-washed, low in EC, and pH-balanced, offering excellent water retention, aeration, and root development. Ideal for nurseries, commercial growers, and home gardeners.

SPECIFICATIONS

Form	Compressed blocks (5 kg per block)
Expansion Ratio	1:6 to 1:8 (approx.) when hydrated with water
EC (Electrical Conductivity)	Below 0.5 mS/cm (low salt, pre-washed)
pH Level	5.5 - 6.5 (balanced for plant growth)
Moisture Content	12% - 15%
Fibre Content	100% coco pith, screened and free of debris
Packaging	5kg compressed blocks, palletized or loose-loaded
Container Loading Capacity	Approx. 20,000 - 24,000 kg per 20ft container

APPLICATIONS

Horticulture & Nurseries: Ideal growing substrate for seedlings, potted plants, and nursery beds.

Commercial Agriculture: Used as a soil conditioner to improve water retention and aeration in field crops.

Hydroponics: A popular soilless growing medium due to its excellent air-to-water ratio.

Landscaping & Home Gardening: Enriches soil structure for lawns, gardens, and terrace gardening.

WHY NISHA & CO

- Established export house since 1987, with decades of trade experience.
- Pre-washed, low-EC, pH-balanced coco peat — ready to use.
- Reliable container loading and export documentation support.
- Flexible packaging and order sizes for B2B and bulk buyers.
